

ORDER — Living Sanctuary · Upgrade Build Brief

For **Grok Superheavy Build** (original creator) · Live site: <https://flora-craft-xenon-silver.grok.me/> · Brief by Ninja for Dan · Sep 7, 2026

Mission: Keep the sanctuary atmosphere and book architecture. Upgrade orientation, progress, persistence of the user's writing, audio accessibility, and pastoral safety — without turning this into a social app or diluting Kirby's voice.

Do not: flatten the visual identity, remove Stillness/audio/journal, reproduce the full manuscript as the primary UX, or add commerce/noise.

Do: ship the P0/P1 items below as a coherent "v1.1 sanctuary" pass; treat P2 as next wave.

1 · PRODUCT CONTEXT (KEEP)

- Interactive companion to Kirby de Lanerolle's **ORDER** — Deliverance, Conscience, Architecture of Freedom.
- Path: **Stillness** → **Chambers (Part I)** → **Assess** → **Authority (7 steps)** → **The Light**.
- Existing strengths to preserve: parchment/cathedral/gold identity; stillness timer (3 exercises); chapter audio; glossary; reflections; Journal; Pages; Prayers toggles; Find; PDF/print manuscript; mobile hamburger.

2 · PROBLEMS TO SOLVE

- No global progress / weak "where am I?"
- Nav terms (Pages, Find, Chambers, Authority) opaque to first-timers
- Notes/assess appear browser-local only — no sync/export/recovery
- Audio: no transcript, no speed control
- Assess is one intense wall of form — needs stepped UX + advisory
- Manuscript print DOM is scroll-heavy for on-screen reading
- Generic reflection placeholders; contrast/readability on small gold labels

3 · BUILD INSTRUCTIONS (EXECUTE IN ORDER)

- P0** **First-run & progress**

 - Add a one-screen **How to walk this** gate (dismissible, remember): sequence Stillness → Chambers → Assess → Authority → Light; link Enter Sanctuary.
 - Add **global progress** in header or Path: Stillness · Chambers x/n · Assess · Authority x/7 · Light — with resume deep-link to last chapter/step + scroll position.
 - Add **Mark complete** on chamber chapters and Authority steps; CTA "Continue to next".
 - Clarify nav labels with short subtitles on first visit (e.g. Pages = "Your saved writing").
- P0** **Assess redesign**

 - Prepend a soft **content advisory** + pastoral framing before Assess opens (educational companion; seek covering; not a substitute for care).
 - Convert Assess into a **stepped interview** (one cluster at a time): Name what occupies (4) → questionnaire sections → legal-rights checklist — with Back/Next and "X of Y" progress (keep existing persistence).
 - Support **dated Assess snapshots** (save "version" with timestamp); allow revisit/compare later.
 - Keep Print assessment + PDF; add "Export my Assess answers" as a clean printable sheet.
- P0** **Persist the pilgrim's work**

 - Add optional **magic-link account** (email) OR device backup code to sync Journal, reflections, Assess, prayer toggles across devices.
 - Until auth ships: **Export all my writing** (JSON + combined PDF) and Import restore from JSON.
 - Surface clearly: "Saved on this device" vs "Synced" so users aren't surprised by data loss.

- P1** **Audio & accessibility**

 - For every audio piece: **transcript** (collapsible), **speed** 0.75 / 1 / 1.25 / 1.5 (persist preference).
 - Inline glossary: tap/hover defined terms in chapter text (reuse glossary data).
 - Unique reflection prompts per chapter/step (replace generic "Write here. It is kept." with contextual lines).
 - Honor prefers-reduced-motion on stillness animations; bump contrast on micro-labels.
 - Crisis/covering footer sitewide: talk to a trusted leader; generic crisis resources; "do not walk alone" after Light.
- P1** **Authority as a wizard**

 - Seven Steps as step cards: audio → reflection → **Seal this step** → next; allow jump back without losing answers.
 - Field Manual mode toggle: stripped chrome, checklist procedure for users mid-crisis (same content, denser UI).
- P1** **Daily entry & reading mode**

 - Today's sit** home CTA: 6-min stillness + one excerpt + one prompt (rotates through path).
 - On-screen manuscript: paginated by chapter (keep full print view separate) to avoid endless print DOM.
 - Separate print packs: Assess worksheet · Seven Steps · Prayers only.
- P2** **Later (category-defining)**

 - Leader/facilitator mode: group stillness timer, discussion prompts per chapter.
 - Audio-first playlist for Part I with reflection pauses.
 - Opt-in "find covering" form (pastor/group) — not a social feed.
 - Share sealed note: private PDF/link of one reflection for a counselor.
 - Optional moderated testimony after "I have spoken this."
 - PWA offline for Stillness + saved notes.
- 4 · ACCEPTANCE CRITERIA (V1.1)**

 - New user can explain the path in <30s after How-to gate.
 - Returning user taps Continue and lands on exact last position.
 - Progress UI matches real completion state across Chambers + Authority.
 - Assess is stepped; advisory shown once before first entry; snapshots save.
 - User can export all writing without an account; with account, data restores on a second browser.
 - At least one chapter audio has transcript + speed control as the pattern for the rest.
 - No regression to Stillness timer, Journal CRUD, Glossary, Find, or PDF download.
 - Mobile hamburger + single-column still clean at 390px width.
- 5 · TONE & CONSTRAINTS FOR BUILD**

 - Copy stays in Kirby's register — reverent, direct, non-gimmicky. No dark-pattern streaks, no points/badges.
 - Educational companion disclaimer remains; intensify pastoral safety near Assess/warfare content.

- Copyright: companion UX original; do not dump full manuscript into interactive chrome beyond existing licensed presentation.

Source review: full interactive walkthrough of the live sanctuary (Stillness, Chambers, Assess, Authority, Light, Journal, Prayers, Pages, Glossary, Find, Download). Hand this sheet to **Grok Superheavy Build** as the upgrade spec. Contact context: Dan · Ninja brief.
